EtherGREEN

WHITE PAPER / NOVEMBER 2017

CONTENTS

ABOUT US #1

EtherGreen community welcomes you! Today millions of people on our beloved planet are admiring the beauty of nature: spectacular mountains, green woods, rivers, lakes and oceans. But only few think about their preservation.

We are a small group of co-thinkers seeking to have our say. We are convinced that creating **GREEN** token, we create a community that will be a whole and care about nature preservation.

Now we see how giant corporations kill our nature, while we keep silence. Together we can create a huge community worldwide. Owning **GREEN** token, you join the community that cares about the future of our nature.

COMMON QUESTIONS #2

Who are you?

We are a small team of enthusiasts and co-thinkers concerned about the future of our planet.

Why should I join you?

We do not force you. Everyone has an individual choice and interests – we appreciate it.

We offer to join us for a close-knit community that values nature preservation.

Why did you choose Etherium?

Etherium's opportunities do not restrict us in any way. This platform is perfect for tackling our tasks.

The core thing is that it's safe, fast, cheap and time-tested.

Is there a future for the team of developers?

We plan to support our community forever. We will always have a job as we protect nature.

Will tokens be sold?

No. This contradicts our concept. This is not the purpose of GREEN token. It is possible to receive a

token through Airdrop for free.

How can we help nature?

After the completion of Airdrop, we aim to enter stock exchanges. Big investors will buy tokens and thereby

make donations. In the future, we will have partners and sponsors (we have certain agreements to be

announced later). We will stay fully accountable to our community.

Today's world is packed with scammers, why should we believe you?

We do not ask for your money and we will never do. We do not sell anything now. We seek to reach many people with our idea.

OUR VISION, PROBLEM – SOLUTION #3

The world has many examples of large companies addressing nature preservation issues. Using their experience, we decided to create a community through blockchain.

Problem:
Deforestation causes stepwise destruction of our planet. And pollution kills people right now. The environmental pollution takes its devastating toll not only on our planet, but also on human beings.

40% of people worldwide die because of environmental pollution, namely, polluted water, soil and air. These environmental problems, along with rapid population growth, lead to a rise in the number of diseases, according to the press release of Cornell University.
Few people pay attention to this. It is imperative to communicate the severity of the problem to the general public.

Solution:
We do not promise to tackle these problems once and for all, since we are just a small group of co-thinkers seeking to make our world a better place. We pursue to create a community able to solve pollution problems, starting low. Partnerships and sponsorships will help us in this matter in the future.

POLLUTION KILLS MORE PEOPLE THAN WARS AND DISASTERS

ROADMAP #4

November 2017

Introducing GREEN token.

Announcing Airdrop, launching registration.

Closing registration. Distributing tokens.

December 2017

Creating a forum for community support.

Distribution of duties.

Searching for partners, sponsors.

2018 Q1-Q2

Creating GREEN universal wallet.

Opening the first store GREEN Wallet.

Establishing a foundation for nature protection.

Taking part in charity.

(This is a small part of what we want right now. The road map will be expanded.)

ETHERGREEN – TOKEN INFORMATION #5

The Ethereum token standard (ERC20) is used

for Ethereum smart contracts.

Total supply **45,000,000**

Contract adress:

**0x108caf59641fc5d27502a87e641872b62d606ae2**

Token Symbol : **GREEN**

Decimals **8**

Token distribuon #6

45 000 000 GREEN

- Airdrop
- Development, Partners, Sponsors
- Listing exchange
- Bounty
- Marketing
- Lucky Draw

A COUPLE OF WORDS

We look forward to your cooperation offers. Please, write
to us: **team@ethergreen.org**

Now we can talk about nature through blockchain technology!

Together we can create a huge community of
like-minded people!

If you have GREEN token, you care about the future of
our planet.
